

SUBJECT INDEX TO VOLUME XIX

- Absorption, percutaneous, effect of dimethyl sulfoxide, 119, 163, 841
of radioactively labeled materials by extracted teeth, 769
- Acidic medium, hydrolysis of monostearin in, 707
- Acne vulgaris, pathogenesis of, 644
- Aging of human skin, four major theories, 829
- Allergy from perfumes, 807
- Alopecia, occurrence in nonhuman primates, 173
- Antibacterial soap, influence of, on various effluents from axillae, 611
synergism in systems comprised of halogenated bisphenols and substituted ureas, 159
- Antimicrobial agents, synergism *in vitro* of, 531
- Axillae, influence of antibacterial soap on various effluents from, 611
- Baldness in nonhuman primates, 173
- Bandrowski's base, function of, in hair dyeing, 141, 823
in studies concerning the reactions of oxidation dye intermediates, 361
- Bisphenols, halogenated, and substituted ureas, antibacterial synergism in systems comprised of, 159
- Bleaching of human hair, quantitative study, 275
- Blind persons, economic employment of, in toiletries industry, 745
- Chromatography, analysis of oxidation dye intermediates, 361
gas-liquid, for evaluation of vapor composition over odorous products preceding and following permeation through plastic films, 713
thin-layer, for separation of oxidation products of *p*-phenylenediamine, 411
thin-layer, in study of metabolism of steroids by *Cladosporium herbarum*, 461
- Cladosporium herbarum*, metabolism of steroids by, 461
- Color and its measurements, 649
natural, of hair, instrumental description and classification of, 595
science of, and eyesweet in cosmetics, 503
- Conductometric testing and corrosion study of nonanhydrous ethanol systems for hair spray, 149
- Consumer panels, local and national, comparison in paired preference test, evaluation of responses, 381
role of, in research, 37
- Corrosion study of nonanhydrous ethanol systems for hair spray, conductometric method for, 149
- Cosmetic chemistry and esthetic medicine, relationship between, 799
- Cosmetics, allergy from perfume in, 807
estimation of hexachlorophane in, 213
eyesweet and color science in, 503
industry, economic employment of blind persons, 745
industry, expansion and manufacturing function, 485
some rheological aspects of, 725
- Crystals, liquid, mesomorphic phases of surfactant compositions, 581
- Curl, polymer properties influencing retention of, at high humidity, 863
- Dandruff, severity of, objective method for evaluation, 669
- Depilatories, effect of, on hair, quantitative study, 699
- Detergents, interaction with human skin, 3
- Differential thermal analysis studies of glyceryl monostearate, 109
- Dimethyl sulfoxide, effect of, on percutaneous absorption, mechanistic study, 119, 163, 841
- Dispersion, and mixing techniques, 225
of pigments in dry powder base, comparison between three mechanical methods, 469
- Dyes, for hair, function of Bandrowski's base in, 141, 823
for hair, oxidation, effect of base components on properties of, 423
for hair, oxidation products of *p*-phenylenediamine in, 411
oxidation intermediates, reactions of, 361
rationale of synthesis program for, 351
- Eczema, influence of detergents on, 3
- Employment of blind persons in toiletries industry, 745
- Emulsifiers, titration method for determination of HLB's of, 129
- Emulsions, effect of initial surfactant locations on viscosity of, 683
nonaqueous, studies on, 627
phase equilibrium diagrams for, 187

- Equilibrium, phase, diagrams; approach to formulation of solubilized and emulsified systems, 187
- Ethanol, nonanhydrous, in hair spray, conductometric testing and corrosion study of, 149
- Extrusion, of cosmetic products, 893
- Eye-brow pencils, extrusion of, 893
- Eyesweet and color science in cosmetics, 503
- Feathers, red, chemical studies of iron pigments of, 675
- Formulation of solubilized and emulsified systems, phase equilibrium diagrams as approach to, 187
- Gel structure of ointments, 289
- Glyceryl monostearate, studies of physical properties of, by X-ray diffraction, differential thermal analysis, and optical microscopy, 109
- Guinea pigs, skin of, used as membrane in studies of effect of dimethyl sulfoxide on percutaneous absorption, 119, 163, 841
- Hair, chemically modified, mechanical hysteresis of, 395
 color of, instrumental description and classification of, 595
 dyeing of, function of Bandrowski's base, 141, 823
 dyes, See Dyes.
 human, quantitative study of bleaching of, 275
 quantitative study of effect of depilatory solutions on, 699
 red, chemical studies of iron pigments of, 675
- Hair spray, nonanhydrous ethanol systems for, conductometric testing and corrosion study, 149
- Heat exchange, *Votator* type, some experiences in developing plant and process for, 245
- Hexachlorophane, estimation of, in cosmetic products, 213
 with substituted ureas, antibacterial synergism of, 159
- HLB of emulsifiers, titration method for determination of, 129
- Hydrolysis of monostearin in acidic medium, 707
- Hysteresis ratio, new parameter for mechanical measure for chemically modified hair, 395
- Iron pigments of red hair and feathers, chemical studies, 675
- Keratin, structure of, as basis for study of mechanical hysteresis of chemically modified hair, 395
- Laboratory data, easy statistical tests for, 95
- Lipliner pencils, extrusion of, 893
- Lipstick base, two manufacturing methods for, 521
- Magnesium sulfate, used to modify bromate-based permanent wave neutralizer, 849
- Manuscripts, directions for preparation of, 455
- Medicine, esthetic, and cosmetic chemistry, relationship between, 799
- Melanin pigmentation and relationship to melanocytes, 565
- Melanocytes and melanin pigmentation, 565
- Metabolism of steroids by *Cladosporium herbarum*, 461
- Metrication, 449
- Microscopy, optical, studies of glyceryl monostearate, 109
- Mixing and dispersion techniques, 225
- Monostearin, hydrolysis of, in acidic medium, 707
- Neutralizer for permanent waving, performance and mechanism of action, 849
- Obituary, Powers, D. H., 349
- Ointments, gel structure of, 289
- Pathogenesis of acne vulgaris, 644
- Perfumes, allergy from, 807
- Permanent wave neutralizer, performance and mechanism of action, 849
- p*-Phenylenediamine in hair dyes, oxidation products of, 411
- Pigments, iron, of red hair and feathers, chemical studies of, 675
 dispersion of, into dry powder base; comparison between three mechanical methods, 469
- Plant, data, easy statistical tests for, 95
 development of, for *Votator* heat exchange, 245
- Polymer properties influencing curl retention at high humidity, 863
- Powder, dry, dispersion of pigments into, 469
- Primates, nonhuman, baldness in, 173
- Products, development of, and psychosensory reactions, 881
 testing of, importance in sphere of product development, 21
- Psychosensory reactions and product development, 849
- Radioactively labeled compounds, absorption of, by extracted teeth, 769
- Research, role of consumer studies, 37
 shortcomings and importance of product testing, 21
- Rheological aspects of cosmetics, 725
- Skin, color of, relationship of melanocytes and melanin pigmentation, 565
 guinea pig, used as membrane in studies of effect of dimethyl sulfoxide on percutaneous absorption, 119, 163, 841
 human, changes in light of current theories of aging, 829
 human, interaction of detergents with, 3

- Soap, antibacterial, influence of, on various effluents from axillae, 611
toilet, antibacterial synergism in systems comprised of halogenated bisphenols and substituted ureas used as germicides in, 159
- Society of Cosmetic Chemists, Great Britain, Annual General Meeting, 560
Annual Report of Council for 1966-67, 59
Annual Report of Council for 1967-68, 555
Committees for 1967-68, 2
Dinner and Dance, 273
Diploma Course, 66
Hibbott Memorial Prize, 66
Officers and Council for 1967-68, 1
Program, 66, 273, 560, 767
Symposia, 66, 67, 274, 561, 562, 768
- Society of Cosmetic Chemists, U.S.A., Annual Report, 69
California Chapter, 350
I.F.F. Award, 828
Literature Award, 643
Medal Award, 75
Midwest Chapter, 80
New England Chapter, 81
New York Chapter, 82, 380
Seminar, 610
- Solubilized systems, phase equilibrium diagrams for, 187
- Spectral analysis of oxidation dye intermediates, 361
- Statistical tests for laboratory and plant data, 95
- Steroids, metabolism of, by *Cladosporium herbarum*, 461
- Sunscreens, biologic problems involved, 85
- Surfactants, composition of, mesomorphic phases; liquid crystals, 581
effect of initial location of, on viscosity of emulsions, 683
- Systems, solubilized and emulsified, phase equilibrium diagrams, 187
- Teeth, extracted, absorption of radioactively labeled materials by, 769
- Titration method for determination of HLB's of emulsifiers, 129
- Toothpaste, manufacture of, application of some experiences in developing *Votator* plant and process for, 245
as test product in comparison of local and national consumer panels, 381
- Ultraviolet, absorption methods for estimation of hexachlorophane in cosmetic products, 213
erythema, and biologic problems concerning sunscreens, 85
radiation, natural, new results on problem of; artificial light protection, 785
- Ureas, substituted, and halogenated bisphenols, antibacterial synergism in systems comprised of, 159
- Vapors, changes in composition of, over odorous products by permeation through plastic films, 713
- Viscosity of emulsions, effect of initial surfactant locations on, 683
- X-Ray diffraction studies of glyceryl monostearate, 109
