

SUBJECT INDEX

- Absorption, potential of skin, 93
 percutaneous, of some anionic surfac-
 tants, 47
 percutaneous, of Triclosan from toilet
 preparations, 205
- Accelerated ageing, pH, and emulsifier, in-
 fluence of, upon preservative require-
 ments of O/W emulsions, 105
- Acne, methods for determination of se-
 baceous matter of skin in regard to,
 141
- Adsorption of Polymer JR of keratinous
 surfaces—Part II, 539
- Allergy, specific lanolin, estimation of gen-
 eral incidence of, 323
- Aluminum chlorhydroxide as active con-
 stituent of antiperspirant preparations,
 inhalational, histological and derma-
 tological studies on, 531
- Amine oxides, utility of, in oil/water cos-
 metic systems, 155
- Analysis, differential thermal, of chrysotile
 asbestos in pure talc and talc contain-
 ing other minerals, 431
 quantitative, of methyl and propylpara-
 ben by high performance liquid chro-
 matography, 377
- Antidandruff agents, shorter methods for
 evaluating, 573
- Antimicrobial activity, residual, *in vivo*
 method for detection of, on human
 skin, 411
- Antiperspirant, evaluation, critical compari-
 son of two procedures for, 255
 preparations, evaluation of, under normal
 conditions of use, 17
 preparations, inhalational, histological
 and dermatological studies on alumin-
 um chlorhydroxide as active constitu-
 ent of, 531
- Asbestos, chrysotile, differential thermal
 analysis of, in pure talc and talc con-
 taining other minerals, 431
- Baby oil as dermal moisturizer, clinical
 evaluation of, 227
- Bacteria, water-borne, and shampoo spoil-
 age, relationship between, 277
- Chelate exchange, determination of zinc
 pyrithione by, 453
- Chlorhexidine in oral products, analytical
 procedures for the determination of,
 355
- Chromatography, high performance liquid,
 quantitative analysis of methyl and
 propylparaben by, 377
 thin-layer, identification of preservatives
 in cosmetic products by, 75
- Cosmetics, and toiletries, implications of
 enlarged European Economic Com-
 munity on quality and safety of, 65
 application, some properties of ethoxy-
 lated lanolin derivatives and their ef-
 fect on, 523
 oil/water, utility of amine oxides in, 155
 products, identification of preservatives
 in, by thin-layer chromatography, 75
- Dentifrices and other semisolids, four
 methods for characterization of, 189
- Deodorant sprays, cough irritation by, 509
- Derivatives, ethoxylated lanolin, some
 properties of, and their effect on cos-
 metic application, 553
- Dermal moisturizer, clinical evaluation of
 baby oil as, 227
- Dermatological, inhalational, and histologi-
 cal studies on aluminum chlorhydrox-
 ide as active constituent of antipers-
 pirant preparations, 531
- Detergents and soaps, factors which deter-
 mine skin irritation potential of, 29
- Electron microscopy, freeze-fracture, repli-
 cation, and transmission, examination
 of particulate inclusions in toothpaste
 by, 477
- Emulsifier, pH, and accelerated ageing, in-
 fluence of, upon preservative require-
 ments of O/W emulsions, 105
- Emulsions, O/W, effects of phase inver-
 sion and surfactant location on forma-
 tion of, 121

- influence of pH, emulsifier, and accelerated ageing upon preservative requirements of, 105
- Essential fatty acids (EFA), role of, in regulatory process of malpighian cell membranes, 485
- European Economic Community, enlarged, implications of on quality and safety of cosmetics and toiletries, 65
- Exposure, exaggerated, in topical irritancy and sensitization testing, 173
- Hair, breakage: scanning electron microscope as diagnostic tool, 289
human head, as forensic evidence, appraisal of, 299
melanin, isolation and identification of protein component of, 247
- Histological, inhalational and dermatological studies on aluminum chlorhydroxide as active constituent of antiperspirant preparations, 531
- Inclusions, particulate, examination of in toothpaste, by freeze-fracture, replication and transmission electron microscopy, 477
- Inhalational, histological and dermatological studies on aluminum chlorhydroxide as active constituent of antiperspirant preparations, 531
- Inversion, phase, and surfactant location, effects of, on formation of O/W emulsions, 121
- In vivo* method for detection of residual antimicrobial activity on human skin, 411
- Irritancy, topical, and sensitization testing, exaggerated exposure in, 173
- Keratinous surfaces, adsorption of Polymer JR, on, Part II, 539
- Membranes, malpighian cell, role of essential fatty acids (EFA) in regulatory processes of, 485
- Methyl and propylparaben by high performance liquid chromatography, quantitative analysis of, 377
- Microbiological quality control—case history, 315
- Microflora, aerobic, of outer eye area of women of Los Angeles, Calif., 83
- Model, animal, for estimating relative sting potential of shampoos, 581
- Moisturization and skin impedance, 337
- Ocular decongestants in rabbits, evaluation of, 397
- Odor eliminators, so-called, 235
- Odors, human body, evaluation of: methods and interpretations, 551
- Orbital area, occurrence of *Pseudomonas aeruginosa* and *Staphylococcus aureus* in, 169
- Outer eye area, aerobic microflora of, of women of Los Angeles, Calif., 83
- Parametric test to measure cleaning power of toothpaste, 217
- pH, emulsifier, and accelerated ageing, influence of, upon preservative requirements of O/W emulsions, 105
- Pigment particle size distribution on tinting, influence of, 389
- Polymer, JR, adsorption of, on keratinous surfaces—Part II, 539
surfactant interaction, water soluble, Part I, 461
- Preservative requirements of O/W emulsions, influence of pH, emulsifier, and accelerated ageing upon preservative requirements of, 105
- Preservatives in cosmetic products, identification of, by thin-layer chromatography, 75
- Protein, component of hair melanin, isolation and identification of, 247
vehicles, influence of, on penetrability of sunscreens, 593
- Pseudomonas aeruginosa* and *Staphylococcus aureus*, occurrence of, in orbital area, 169
- Rabbit, action and fate of sodium pyridine-thione when applied topically to, 3
- Rabbits, evaluation of ocular decongestants in, 397
- Scanning electron microscope as diagnostic tool: hair breakage, 289
- Sebaceous matter of skin, methods for determination of, in regard to acne, 141
- Sensitization testing and topical irritancy, exaggerated exposure in, 173
- Shampoo spoilage and water-borne bacteria, relationship between, 277
- Shampoos, animal model for estimating relative sting potential of, 581
- Skin, absorption potential of, 93
impedance and moisturization, 337
in regard to acne, methods for determination of sebaceous matter of, 141
in vivo method for the detection of residual antimicrobial activity on, 411
irritation potential of soaps and detergents, factors which determine the, 29
- Soaps and detergents, factors which determine skin irritation potential of, 29

- Society of Cosmetic Chemists, Great Britain, committees for 1974-75, 2
 Medal Lecture, 375
 Officers and Council for 1974-75, 1
 Society of Cosmetic Chemists, U.S.A.
 IFF Award, 388
 Literature Award, 118
 Medal Award, 92
 Merit Award, 120
 Officers for 1975, 82
 Perry Brothers Award, 426
 Shaw Mudge Award, 410
 Sodium Pyridinethione, action and fate of when applied topically to rabbit, 3
 Staphylococcus aureus and Pseudomonas aeruginosa, occurrence of, in orbital area, 169
 Sting potential of shampoos, relative, animal model for estimating, 581
 Sunscreens, influence of protein vehicles on penetrability of, 593
 Surfactant location and phase inversion, effects of, on formation of O/W emulsions, 121
 Surfactants, anionic, percutaneous absorption of some, 47
 Suspensions, stability of, 439
 Talc, pure, and talc containing other minerals, differential thermal analysis of chrysotile asbestos in, 431
 Tinting, influence of pigment particle size distribution on, 389
 Toiletries and cosmetics, implications of enlarged European Economic Community on quality and safety of, 65
 Toothpaste, parametric test to measure cleaning power of, 217
 Triclosan, percutaneous absorption of, from toilet preparations, 205
 Zinc pyrithione, determination of, by chelate exchange, 453
