

SUBJECT INDEX TO VOLUME 63

- Absorption**
of anhydrous sunscreen formulations, 213
- Acetyl tetrapeptide-3**
modulation of male pattern alopecia, 144
- Acne**
treatment with lactobacillus extract, 3604
- Acne vulgaris**
treatment with fullereneol, 259
- Active compounds**
technological forecasting in product innovation, 3603
- Additives**
in cosmetic emulsions, 292
- Adsorption isotherms**
trehalose in hair straightening, 233
- Aesthetics**
of colorants in cosmetics, 3606
of hand sanitizer, 290
- African American hair**
styling polymer performance on, 68
- Aging**
lipidic homeostasis, 277
rice meristem in skin rejuvenation, 284
- Alaria esculenta***
melanosome transfer evaluation, 197
- Aloe-emodin**
suppression of keratinocytes, 297
- Alopecia**
male pattern, 144
- α -linolenic acid**
composition of RBCs in women, 303
- Amino acids**
effects of oxidative treatments on hair, 15
- p-Aminobenzoic acid**
analysis of UV filters, 103
- Aminophenols**
as hair dye components, 321
- Angiogenesis inhibitors**
discovery of, 62
- ANSI/NSF/GCI 355 standard**
impact on chemical industry, 274
- Anti-aging cosmetics**
photostability of, 140
role of TRF2, 146
- Antibiotic resistance**
UVc radiation, 133
- Antimicrobial peptides**
lactobacillus extract in treatment of acne, 3604
- Antioxidants**
skin-whitening effects of herbal extracts, 311
- Apoptosis**
aloe-emodin in suppression of keratinocytes, 297
- Applicators**
technological forecasting in product innovation, 3603
- Aquaporins**
skin barrier function, 286
- Asia**
skin-lightening cosmetics in, 43
- Asian hair**
styling polymer performance on, 68
- Atom transfer radical polymerization**
in polymer synthesis, 150
- Atomic force microscope**
determination of hair damage, 64
- Automated multiple development**
HPTLC analysis of lipids, 276
- Automation**
assessment of hair shine products, 3607
measure of hair torsional properties, 81
- Avobenzone**
in lip balm sunscreen, 295
- Bacteria**
lactobacillus extract in treatment of acne, 3604
- Beeswax**
studies on stick bases, 93
- Benzalkonium chloride**
in hand sanitizer, 290
- Benzenediamines**
as hair dye components, 321
- Benzenediols**
as hair dye components, 321

- Benzophenone-3**
analysis of UV filters, 103
- Benzophenone-8**
analysis of UV filters, 103
- β -lactams**
effect of UVc radiation, 133
- Bioactive fermentation extracts**
optimization of skin barrier function, 279
- Biochemical pathways**
stimulation in skin, 1
- Biofunctionals**
IV10.001 prevention of hair follicle aging, 142
- Biomaterials**
and biotechnology, 62
- Blanching**
assessment via polarization spectroscopy, 72
- Bleach**
effects on hair keratin films, 15
wetting behavior of hair fibers, 33
- Bodywash**
cationic formulation, 76
- Botanicals**
photochemoprotective herbs, 119
skin-lightening cosmetics, 43
- Burns**
prevention via color cosmetic coating, 60
- Butyl methoxydibenzoylmethane**
analysis of UV filters, 103
- Candelilla wax**
studies on stick bases, 93
- Capparis spinosa***
skin-whitening effects, 311
- Carnauba wax**
studies on stick bases, 93
- Caspase-14**
optimization of skin barrier function, 279
- Castor oil**
studies on stick bases, 93
- Catechin hydrate**
phenolic compounds in ethanol extracts, 225
- Cathodic reduction**
reshaping hair, 70
- Caucasian hair**
styling polymer performance on, 68
- Cellular senescence**
TRF-2 anti-aging applications, 146
- Centella asiatica***
photochemoprotective herbs, 119
- Chlorhexidine gluconate**
hand hygiene in health care workers, 78
- Cinnamon zeylanicum***
photochemoprotective herbs, 119
- Ciprofloxacin**
effect of UVc radiation, 133
- Citric acid cycle**
energetic pathway stimulation by D-panthenyl triacetate, 1
- Citronellic acid**
effects on melanin biosynthesis, 3601
- Citronellol**
effects on melanin biosynthesis, 3601
- Citrus sinensis***
skin-whitening effects, 311
- Cleansing systems**
surfactants in, 151
- Cocamidopropyl betain**
sunscreen spreading quality, 243
- Coconut oil**
penetration into hair, 27
studies on stick bases, 93
- Colorants**
in cosmetics, 3606
- Compression strength**
of natural oils and waxes, 93
- Conditioning treatment**
wetting behavior of hair fibers, 33
- Contact angle**
wetting behavior of hair fibers, 33
- Cosmetic coating**
prevention of skin injury, 60
- Cosmetic emulsions**
emulsifiers, emollients, and additives in, 292
D-panthenyl triacetate in wound healing, 1
preparation of, 333
- Cosmetic preparations**
technological forecasting in product innovation, 3603
- Cosmetics**
analysis of UV filters, 103
anti-aging skin care, 140
combination with biological activity on skin, 58
gene expression in product development, 283
kojic acid for skin whitening, 205
lipid analysis by HPTLC, 276
natural, 267
pigments in, 3606
RAFT polymerization, 155
skin-lightening, 43
- Cysteic acid**
effects of oxidative treatments on hair, 15
- Cystine hair smoothing system**
high performance and low damage of, 64
- Deformation**
measure of hair torsional properties, 81
- Diaminopyridine**
as hair dye component, 321
- Diethylhexyl butamidotriazone**
analysis of UV filters, 103

- Differential scanning calorimetry**
natural oils and waxes, 93
- Differential wetting characterization**
of hair fibers, 33
- Digital micrography**
polymeric film properties, 213
- Diode array detector**
determination of hair dye components, 321
- Disulfide bonds**
perming hair with thioglycolic acid, 177
- Drometrizole**
analysis of UV filters, 103
- Drop point**
of natural oils and waxes, 93
- Droplet shape**
wetting behavior of hair fibers, 33
- Drug delivery systems**
development of, 62
- Ectodomain shedding**
Pmel 17 in melanosome transfer evaluation, 197
- Elastic modulus**
preparation of cosmetic emulsions, 333
- Electrolysis**
reshaping hair, 70
- Electroporation**
delivery of therapeutic agents, 223
- Emollients**
in cosmetic emulsions, 292
- Emulsifiers**
in cosmetic emulsions, 292
- Environmental impact**
ANSI/NSF/GCI 355 standard, 274
in materials design, 270
of natural cosmetics, 267
- Environmental stress**
effect on hair fibers, 66
lipidic homeostasis, 277
optimization of skin barrier function, 279
- Epigenetics**
rice meristem in skin rejuvenation, 284
skin care product development, 283
- Erythema**
assessment via polarization spectroscopy, 72
treatment with lactobacillus extract, 3604
- Erythromycin**
effect of UVc radiation, 133
- Ethanol**
anti-tyrosinase activity, 225
- Ethylhexyl dimethyl p-aminobenzoic acid**
analysis of UV filters, 103
- Ethylhexyl methoxycinnamate**
analysis of UV filters, 103
- Ethylhexyl triazone**
analysis of UV filters, 103
- Excipients**
technological forecasting in product innovation, 3603
- Facial skin conditions**
association with mood in women, 303
- Facial tissue products**
phase change materials in, 293
- Fairness**
skin-lightening cosmetics, 43
- Fatty acids**
composition of RBCs in women, 303
- Feel**
of polymeric formulations, 150
- Finite element method**
droplet configuration, 33
- Flavon**
phenolic compounds in ethanol extracts, 225
- Flavor**
of lip balm sunscreen, 295
- Flow cytometric analysis**
aloe-emodin in suppression of keratinocytes, 297
- 4-Fluoro-7-nitro-2,1,3-benzoxadiazole**
pre-column derivatization, 205
- Fluoroquinolone**
effect of UVc radiation, 133
- Force-extension curve**
perming hair with thioglycolic acid, 177
- Forehead pigmentation**
association with mood in women, 303
- Fourier-transform infrared spectroscopy**
effects of oxidative treatments on hair, 15
- Free radicals**
suppression via UVA filters, 148
UV-nanocapsules in hair care, 153
- FTT950 method**
measure of hair torsional properties, 81
- Fullerenol**
treatment for acne, 259
- Functional packaging**
technological forecasting in product innovation, 3603
- Gallic acid**
phenolic compounds in ethanol extracts, 225
- Gene expression**
skin barrier function, 286
skin care product development, 283
- Genomics**
skin care product development, 283
- Geranic acid**
effects on melanin biosynthesis, 3601
- Geraniol**
effects on melanin biosynthesis, 3601
- Globular matrix**
perming hair with thioglycolic acid, 177

Glycation

glycotoxins in skin, 288

Glycolysis

energetic pathway stimulation by D-panthenyl triacetate, 1

Glycoproteins

Pmel 17 in melanosome transfer evaluation, 197

Glycotoxins

effects of glycation, 288

Grapes

anti-tyrosinase activity of ethanol extracts, 225

Graying hair

follicle aging, 142

Green chemistry

ANSI/NSF/GCI 355 standard, 274

in materials design, 270

polymers in hair styling, 271

in the supply chain, 273

Hair

penetration of coconut oil, 27

Hair coloring

surface-active functionals for, 56

Hair damage

prevention via UV filters, 153

wetting behavior of hair fibers, 33

Hair dressings

coconut oil penetration into hair, 27

Hair dyes

determination of components, 321

Hair fibers

differential wetting characterization, 33

evaluation of environmental stress, 66

measure of torsional properties, 81

perming with thioglycolic acid, 177

Hair follicles

coconut oil penetration, 27

prevention of aging, 142

Hair keratin films

effects of oxidative treatments, 15

Hair loss

male pattern, 144

Hair shine

assessment of hair care products, 3607

Hair straightening

heat styling with trehalose, 233

high performance and low damage of, 64

Hair styling

sustainable polymers for, 271

Hamster models

fullerenol for acne treatment, 259

Hand hygiene

in health care workers, 74, 78

Hand sanitizer

innovation formulation approaches, 290

HD6

SPF optimization on PMMA plates, 243

Health care workers

hand hygiene in, 74, 78

Healthcare-acquired infections

hand hygiene in health care workers, 74, 78

Heat styling

trehalose in hair straightening, 233

Herbal creams

botanical photochemoprotectives, 119

Herbal extracts

skin whitening, 311

Hexane

coconut oil penetration into hair, 27

High-performance liquid chromatography

analysis of lipids, 276

analysis of UV filters in cosmetics, 103

components in oxidative hair dyes, 321

kojic acid for skin whitening, 205

High throughput

measure of hair torsional properties, 81

Humidity

trehalose in hair straightening, 233

Hyaluronic acid

optimization of skin barrier function, 279

Hydrogen peroxide

effects on hair keratin films, 15

MSRA protection from oxidative stress, 3602

Hydrophilicity

of HD6, 243

in nicotinamide microemulsion-based gels, 3605

Hydrophobicity

coconut oil penetration into hair, 27

wetting behavior of hair fibers, 33

Hydroxyanthraquinones

aloe-emodin in suppression of keratinocytes, 297

Hyperpigmentation

skin-whitening effects of herbal extracts, 311

Immunoblotting

effects of oxidative treatments on hair, 15

Immunofluorescence microscopy

effects of oxidative treatments on hair, 15

***In vitro* sun protection factor**

optimization on PMMA plates, 243

Inductively coupled plasma-mass spectrometry

lead content in lipstick, 159

Interfacial tension

between sunscreen and substrate, 243

Intermediate filament proteins

perming hair with thioglycolic acid, 177

Ion-pair reagent

determination of hair dye components, 321

Iontophoresis

delivery of therapeutic agents, 223

- Ironing hair**
trehalose in hair straightening, 233
- Irritant contact dermatitis**
hand skin health in health care workers, 74
- Isoamyl p-methoxycinnamate**
analysis of UV filters, 103
- Isoprenoids**
synthesis pathway stimulation by D-panthenyl triacetate, 1
- IV10.001**
hair follicle aging, 142
- Jojoba oil**
studies on stick bases, 93
- Keratin-associated protein**
perming hair with thioglycolic acid, 177
- Keratin films**
effects of oxidative treatments on hair, 15
- Keratinocytes**
aloe-emodin suppression of, 297
MSRA protection from oxidative stress, 3602
- Kojic acid**
in skin-whitening cosmetics, 205
- Kuromanin chloride**
phenolic compounds in ethanol extracts, 225
- Lactate dehydrogenase release assay**
aloe-emodin in suppression of keratinocytes, 297
- Lactobacillus extract**
treatment for acne, 3604
- Lactobacillus plantarum***
effect of probiotics on skin, 3604
- Lamellar phases**
in cosmetic emulsions, 292
- Lead content**
in lipstick, 159
- Lip balm**
sunscreen formulation in, 295
- Lipase activity**
of *Propionibacterium acnes*, 259
- Lipid synthesis**
by D-panthenyl triacetate, 1
- Lipid homeostasis**
skin barrier structure, 277
- Lipids**
analysis by HPTLC, 276
stratum corneum, 281
- Lipstick**
lead content in, 159
- Loss modulus**
preparation of cosmetic emulsions, 333
- Luster**
calculation of, 3607
- Macrolide**
effect of UVc radiation, 133
- Make-up**
biological activity on skin, 58
- Materials design**
green chemistry in, 270
- MC1R activity**
down regulation in skin-lightening, 43
- Melan-a cells**
melanin biosynthesis in, 3601
- Melanin**
geranic acid effects on biosynthesis, 3601
hair follicle aging, 142
melanosome transfer evaluation, 197

- Nylon fibers**
 - measure of hair torsional properties, 81
- Octocrylene**
 - analysis of UV filters, 103
- Oil-in-water nanoemulsions**
 - preparation of, 333
- Oils**
 - studies on stick bases, 93
- Olea europaea***
 - skin-whitening effects, 311
- Opacifier technology**
 - cationic bodywash formulation, 76
- Opsira Shine-Box**
 - screening tool for hair shine, 3607
- Oryza sativa***
 - skin-whitening effects, 311
- Oxidative stress**
 - fullerenol for acne treatment, 259
 - hair follicle aging, 142
 - MSRA protection from, 3602
- Oxidative treatments**
 - effects on hair keratin films, 15
- Oxygen-radical scavengers**
 - fullerenol for acne treatment, 259
 - skin-whitening effects of herbal extracts, 311
- Palm oil esters**
 - preparation of cosmetic emulsions, 333
- D-Panthenol**
 - transformation from D-panthenyl triacetate, 1
- D-Panthenyl triacetate**
 - transformation into D-panthenol, 1
- Particle distributions**
 - preparation of cosmetic emulsions, 333
- Patents**
 - technological forecasting, 3603
- Pearlescence**
 - in hand sanitizer, 290
- Peel extracts**
 - anti-tyrosinase activity of ethanol, 225
- Pendulum methods**
 - measure of hair torsional properties, 81
- Penicillin**
 - effect of UVc radiation, 133
- Peptides**
 - technological forecasting in product innovation, 3603
- Percutaneous absorption**
 - of therapeutic agents, 223
- Perming hair**
 - alternative methods for, 70
 - with thioglycolic acid, 177
- Personal care products**
 - D-panthenyl triacetate in wound healing, 1
- Phase change materials**
 - in facial tissue products, 293
- Phenolic content**
 - ethanol extracts from grapes, 225
- 2-Phenylbenzimidazole-5-sulfonic acid**
 - analysis of UV filters, 103
- Photochemoprotective herbs**
 - for improving skin properties, 119
- Photosensitivity**
 - skin-whitening effects of herbal extracts, 311
- Photostability**
 - anti-aging skin care cosmetics, 140
- Physical technologies**
 - delivery of therapeutic agents, 223
- Pigmentation**
 - association with mood in women, 303
 - skin-lightening cosmetics, 43
- Pigments**
 - in cosmetics, 3606
- Pmel 17**
 - melanosome transfer evaluation, 197
- Polarization spectroscopy**
 - skin care product testing, 72
- Pollution**
 - effect on hair fibers, 66
- Polyhydroxylated fullerene**
 - fullerenol for acne treatment, 259
- Polymers**
 - anhydrous sunscreen compositions, 213
 - in prestige skincare products, 150
 - RAFT technology in, 155
 - sensory test methodology, 271
- Polymethyl methacrylate**
 - polymeric film properties, 213
 - SPF optimization, 243

- Polyphenols**
gene expression in product development, 283
skin-whitening effects of herbal extracts, 311
- Polyunsaturated fatty acids**
composition of RBCs in women, 303
- Pre-column derivatization**
with 4-fluoro-7-nitro-2,1,3-benzoxadiazole, 205
- Preservatives**
in surfactant cleansing systems, 151
