

INDEX TO VOLUME 33

SUBJECT INDEX

- Additives;** cosmetics; effects, butylparaben, preservatives, solubilization by nonionic surfactants, 297
- Adsorption;** butylparaben; preservatives, cosmetics, effects, solubilization by nonionic surfactants, 297
- Alcloxa;** astringents; effects, aluminum chlorohydrate antiperspirant formulations, humans, 179
- Alcohols;** effects; α -keratin, hair fibers, physical properties, review, 385
- Allergens;** cosmetics; tests, patch, lack, clinical correlation, factors affecting, 309
- Allergies**
cosmetics; allergens, irritants, patch tests, lack, clinical correlation, factors affecting, 390; eye preparations, discussion, 249
- Almond oil;** emulsions; occlusivity, o/w, effects, surfactants, HLB, formulations, 157
- Aluminum chlorohydrate,** see **Aluminum chlorohydrate**
- Aluminum chlorhydroxy allantoinate,** see **Alcloxa**
- Aluminum chlorohydrate**
antiperspirants; effects, vehicles, evaluations, formulations, humans, 179; mechanism of action, in vitro simulation, 281
- Aluminum hydroxide;** antiperspirants; aluminum chlorohydrate, conversion, mechanism, in vitro simulation, 281
- Amino acids;** analysis; cosmetics, raw materials, developments, 407
- Aminoacetic acid;** chromatography, liquid; antiperspirants, sticks and roll-ons, 359
- p-Aminophenol;** hair dyes; reactions, kinetics, 375
- Analgesics and antipyretics;** salicylamide; stability, suspensions, with polysorbate 80, effects, polyols, 149
- Analysis**
cosmetics; raw materials, instrumentation, developments, 407
dyes; oxidation, hair dyes and tints, 97
nail preparations; artificial nails, formulations, 51
- Androstenol;** odors; body, axillary, sources, analysis, review, 193
- Androstenone;** odors; body, axillary, sources, analysis, review, 193
- Anesthetics, local;** butamben; stability, suspensions, with polysorbate 80, effects, polyols, 149
- Antibacterial agents**
sulfamerazine; stability, suspensions, with polysorbate 80, effects, polyols, 149
- Antiperspirants**
aluminum chlorohydrate; effects, vehicles, evaluations, formulations, humans, 179; mechanism of action, in vitro simulation, 281
aluminum hydroxide; conversion, from aluminum chlorohydrate, mechanism, in vitro simulation, 281
aminoacetic acid; chromatography, liquid, sticks and roll-ons, 359
- Antiseborrheic agents;** pyrithione zinc; comparison, triclosan, antimicrobial effects, shampoos, humans, 27
- Astringents;** alcloxa; effects, aluminum chlorohydrate, antiperspirant formulations, humans, 179
- Automation, data processing, computers;** skin; desquamation, corneocytes, evaluations, humans, 1

- Bacteria;** skin; axillary, sources, odors, analysis, review, 193
- Benzoyl peroxide**
allergens; tests, patch, lack, clinical correlation, factors affecting, 309
analysis; nail preparations, artificial nails, formulations, 51
- Benzylparaben;** resistance; *E. coli*, and other bacteria, factors affecting, 75
- Buffers;** vehicles; parabens, effects, resistance, *E. coli* and other bacteria, 75
- Butamben;** stability; suspensions, with polysorbate 80, effects, polyols, 149
- Butylparaben**
preservatives; effects, solubilization by nonionic surfactants, additives, cosmetics, 297
resistance; *E. coli*, and other bacteria, factors affecting, 75
- Carcinogens;** analysis; contamination, cosmetic raw materials, developments, 407
- Chlorine;** toxicity; solutions, hair, fibers, human, friction and morphology effects, analysis, 229
- Chromatography, gas;** 1,4-dioxane; ethoxylated compounds, and MS, ion monitoring, 19
- Chromatography, liquid;** aminoacetic acid; antiperspirants, sticks and roll-ons, 359
- Cloud points;** surface active agents; nonionic, solubilizers, butylparaben, effects, additives, cosmetics, 297
- Coefficient of friction;** hair; human, fibers, effects, chlorine solutions, analysis, 229
- Concentration**
butylparaben; preservatives, cosmetics, effects, solubilization by nonionic surfactants, 297
chlorine; solutions, effects, human hair fibers, friction and morphology, analysis, 229
parabens; effects, resistance, *E. coli* and other bacteria, 75
polyols; effects, stability, suspensions, hydrophobic solids, with polysorbate 80, 149
surface active agents; nonionic, and homogeneity, effects, HLB, emulsions, 115; nonionic, effects, o/w emulsions, occlusivity, formulations, 157
- Contamination;** cosmetics; raw materials, trace, analysis, developments, 407
- Cosmetics**
adverse reactions; eye preparations, and therapy, discussion, 249
allergens; and irritants, patch tests, lack, clinical correlation, factors affecting, 309
analysis; raw materials, instrumentation, developments, 407
emulsions; stability, mechanisms, methods, evaluations, 345
preservatives; butylparaben, effects, solubilization by nonionic surfactants, additives, 297
skin; emulsions, w/o, comparison, o/w, emollient effects, humans, 263
- Creams;** dyes; hair, analysis, oxidation dyes, 97
- Cuticle;** hair; damage, grooming effects, decreased by conditioners, tresses and humans, 203
- Cystine;** and gelatin; dietary supplements, increased hair growth, humans, 95
- 2,4-Diaminoanisol,** see **4-Methoxy-m-phenylenediamine**
- Dielectric constants;** oils; emulsions, o/w, lack, effects, occlusivity, formulations, 157
- Dietary supplements**
cystine and gelatin; increased, hair growth, humans, 95
gelatin and cystine; increased, hair growth, humans, 95
- 1,4-Dioxane**
analysis; ethoxylated compounds, GC/MS, ion monitoring, 19
contaminants; cosmetics, raw materials, analysis, developments, 407
- Dipyrithione;** decomposition products; pyri-thione sodium, hydrolysis, solutions, pH and temperature effects, storage, 243
- Disinfectants;** triclosan; comparison, pyri-thione zinc, effects, shampoos, humans, 27
- Dispersions;** stability; cosmetics, mechanisms, methods, evaluations, 345
- 2,2'-Dithiobispyridine, 1,1'-dioxide,** see **Dipyrithione**
- Dosage forms;** aluminum chlorohydrate; antiperspirants, effects, vehicles, evaluations, humans, 179
- Drugs, adverse reactions**
cosmetics; allergens, patch tests, lack, clinical correlation, factors affecting, 309; eye preparations, allergies, discussion, 249
- Drugs, clinical effectiveness;** aluminum chlorohydrate; antiperspirants, effects, vehicles, evaluations, formulations, humans, 179
- Dyes**
contamination; p-toluidine, cosmetics, analysis, developments, 407
oxidation; analysis, hair dyes and tints, 97
- Elasticity;** skin; effects, temperature and moisture, relaxation, excised hamster skin, 169

- Electricity;** α -keratin; fibers, hair, conduction, factors affecting, review, 385
- Emulsifying agents;** surface active agents; nonionic, effects, HLB, o/w emulsions, occlusivity, formulations, 157
- Emulsions**
oil-in-water; comparison, water-in-oil, emollient effects, human skin, 263; effects, surface active agents, HLB, critical micelle concentration, 115; occlusivity, surfactants, HLB, formulations, 157; vehicles, parabens, effects, resistance, *E. coli* and other bacteria, 75
stability; cosmetics, mechanisms, methods, evaluations, 345
water-in-oil; comparison, oil-in-water, emollient effects, human skin, 263
- Equipment;** analysis; cosmetics, raw materials, developments, 407
- Escherichia coli;** resistance; parabens, factors affecting, 75
- Ethylparaben;** resistance; *E. coli*, and other bacteria, factors affecting, 75
- Eye preparations;** cosmetics; adverse reactions, and therapy, discussion, 249
- Eyeshadows;** adverse reactions; and therapy, discussion, 249
- Fibers;** α -keratin; hair, physical properties, factors affecting, review, 385
- Flocculation;** emulsions; cosmetics, stability, mechanisms, 345
- Foams**
dyes; oxidation, aerosols, hair tints, analysis, 97
soaps; rheology, relation, bubble size, 131
- Formic acid;** effects; α -keratin, hair fibers, physical properties, review, 385
- Formulations;** aluminum chlorohydrate; antiperspirants, effects, vehicles, evaluations, humans, 179
- Gelatin;** and cystine; dietary supplements, increased hair growth, humans, 95
- Glycine,** see **Aminoacetic acid**
- Hair**
 α -keratin; fibers, physical properties, factors affecting, review, 385
chlorination; effects, fibers, human, friction and morphology, analysis, 229
damage; cuticle, grooming effects, decreased by conditioners, tresses and humans, 203
dyes; and tints, oxidation dyes, analysis, 97
growth; increased, by cystine and gelatin supplements, humans, 95
lipids; extraction, composition, correlation, oiliness, human samples, analysis, 317
volume; effects, moisture, measurement, Air Comparison Pycnometer, 85
- Hair dyes;** reactions; kinetics, 375
and tints; oxidation, analysis, 97
- Hair preparations**
conditioners; control, hair cuticle damage, grooming effects, tresses and humans, 203
shampoos; pyrrithione zinc, comparison, triclosan, effects, humans, 27
- Hair waving**
sulfites, comparison, thioglycolates; effects, hair fibers, setting solutions, 363
thioglycolates, comparison, sulfites; effects, hair fibers, setting solutions, 363
- Homogeneity;** surface active agents; nonionic, and concentration, effects, HLB, emulsions, 115
- Homomenthyl salicylate,** see **Homosalate**
- Homosalate;** sunscreen agents; lotions, protection factor, evaluation methods, animals, 9
- Hydrogen ion concentration**
chlorine; solutions, effects, human hair fibers, friction and morphology, analysis, 229
effects; aluminum chlorohydrate, antiperspirants, in vitro simulation, 281
pyrrithione sodium; effects, hydrolysis, solutions, storage, 243
- Hydrolysis;** pyrrithione sodium; solutions, pH and temperature effects, storage, 243
- Hydrophilic-lipophilic balance**
emulsions; effects, emollient, w/o, comparison, o/w, human skin, 263; oil-in-water, surfactants, effects, occlusivity, formulations, 157
surface active agents; nonionic, effects, emulsions, critical micelle concentration, 115
- Hydrophobicity;** surface active agents; nonionic, effects, solubilization, butylparaben, preservatives, cosmetics, 297
- Industry**
cosmetics; eye preparations, adverse reactions, preventive measures, role, 249; tests, patch, allergens, irritants, lack, clinical correlation, problems, 309
- Irgasan DP-300,** see **Triclosan**
- Irritants;** cosmetics; tests, patch, lack, clinical correlation, factors affecting, 309
- Isovaleric acid;** odors; body, axillary, sources, analysis, review, 193
- Joboba wax;** toxicity; lack, topical and SC, long term, animals, 141
- Keratin;** hair; absorption, moisture, effects, volume, measurement, Air Comparison Pycnometer, 85
- α -Keratin;** fibers; hair, physical properties, factors affecting, review, 385

- Keratolytic agents;** benzoyl peroxide; allergies, patch tests, lack, clinical correlation, factors affecting, 309
- Kinetics;** hair dyes; reactions, 375
- Lipids**
emulsions; water-in-oil, comparison, o/w, emollient effects, human skin, 263
hair; extraction, composition, correlation, oiliness, human samples, analysis, 317
- Lithium bromide;** effects; α -keratin, hair fibers, physical properties, review, 385
- Mascara;** adverse reactions; and therapy, discussion, 249
- Mechanism of action**
aluminum chlorohydrate; antiperspirants, mechanism of action, in vitro simulation, 281
cystine and gelatin; dietary supplements, increased hair growth, humans, 95
gelatin and cystine; dietary supplements, increased hair growth, humans, 95
- Methacrylates;** analysis; artificial nails, monomers and polymers, formulations, 51
- Methodology**
Air Comparison Pycnometer; measurement, hair volume, effects, moisture, 85
antiperspirants; aluminum chlorohydrate, mechanism of action, in vitro simulation, 281
skin; corneocytes, desquamation, evaluations, computers, humans, 1
sunscreen agents; evaluations, protection factor, animals, 9; Sun Protection Factor, evaluation, range finding technique, humans, 259
tests; patch, allergens, cosmetics, lack, clinical correlation, factors affecting, 309
- 4-Methoxy-m-phenylenediamine;** analysis; dyes, hair, in-use, 97
- Methylparaben;** resistance; E. coli, and other bacteria, factors affecting, 75
- Micelles;** critical concentration; surface active agents, nonionic, effects, HLB, emulsions, 115
- Miglyol 812;** emulsions; occlusivity, o/w, effects, surfactants, HLB, formulations, 157
- Mineral oil**
comparison, triglycerides; topical, effects, skin, mice, 93
emulsions; occlusivity, o/w, effects, surfactants, HLB, formulations, 157
- Moisture**
 α -keratin; fibers, hair, effects, physical properties, review, 385
hair; effects, volume, measurement, Air Comparison Pycnometer, 85
skin; effects, elasticity and relaxation, excised hamster skin, 169; loss, transepidermal, effects, w/o and o/w emulsions, humans, 263
- Molecular weight;** parabens; effects, resistance, E. coli and other bacteria, 75
- Monomers;** methacrylates; nail preparations, artificial nails, formulations, analysis, 51
- Montane 80,** see **Sorbitan monooleate**
- Montanox 80,** see **Polysorbate 80**
- Morphology;** hair; human, fibers, effects, chlorine solutions, analysis, 229
- Nail preparations;** artificial nails; analysis, formulations, 51
- Nitrosamines;** analysis; contamination, cosmetic raw materials, developments, 407
- Nonylphenols;** polyoxyethylenated; hydrophilic-lipophilic balance, effects, emulsions, critical micelle concentration, 115
- Odors;** body; axillary, sources, bacteria and odorants, analysis, review, 193
- Oils;** emulsions; occlusivity, o/w, effects, surfactants, HLB, formulations, 157
- Oleth-10;** emulsifying agents; effects, HLB, o/w emulsions, occlusivity, formulations, 157
- Oleth-2;** emulsifying agents; effects, HLB, o/w emulsions, occlusivity, formulations, 157
- Partition coefficients;** surface active agents; nonionic, effects, HLB, critical micelle concentration, emulsions, 115
- PEG-8,** see **Polyethylene glycol 400**
- Perfumes;** analysis; cosmetics, raw materials, developments, 385
- Perhydroqualene,** see **Squalane**
- Perspiration;** axillary; odors, bacteria and odorants, sources, analysis, review, 193
- p-Phenylenediamine;** hair dyes; reactions, kinetics, 375
- Polarity;** oils; emulsions, o/w, effects, occlusivity, formulations, 157
- Polyethylene glycol 400**
analysis; 1,4-dioxane, GC/MS, ion monitoring, 19
effects; stability, suspensions, hydrophobic solids, with polysorbate 80, 149
- Polymers;** methacrylates; nail preparations, artificial nails, formulations, analysis, 51
- Polyols;** solubilizing agents; effects, stability, suspensions, hydrophobic solids, with polysorbate 80, 149
- Polyoxyethylene (10) oleyl ether,** see **Oleth-10**
- Polyoxyethylene (20) sorbitan monooleate,** see **Polysorbate 80**
- Polysorbate 60;** analysis; 1,4-dioxane, GC/MS, ion monitoring, 19

- Polysorbate 80**
emulsifying agents; effects, HLB, o/w emulsions, occlusivity, formulations, 157
surface active agents; suspensions, hydrophobic solids, stability, effects, polyols, 149
- Preservatives**
butylparaben; effects, solubilization by nonionic surfactants, additives, cosmetics, 297
cosmetics; analysis, developments, 407
parabens; resistance, *E. coli* and other bacteria, factors affecting, 75
pyrithione sodium; stability, and hydrolysis, solutions, pH and temperature effects, storage, 243
- Propylene glycol**; effects; stability, suspensions, hydrophobic solids, with polysorbate 80, 149
- Propylparaben**; resistance; *E. coli*, and other bacteria, factors affecting, 75
- Pseudomonas aeruginosa**; skin; colonization, transient, humans, 225
- p,t-Octylphenols**; polyoxyethylenated; hydrophilic-lipophilic balance, effects, emulsions, critical micelle concentration, 115
- 2-Pyridinesulfonic acid 1-oxide**; decomposition products; pyrithione sodium, hydrolysis, solutions, pH and temperature effects, storage, 243
- Pyrithione sodium**; stability; and hydrolysis, solutions, pH and temperature effects, storage, 243
- Pyrithione zinc**; comparison, triclosan; effects, antimicrobial and antidandruff, shampoos, humans, 27
- Radiation**; infrared; α -keratin, hair fibers, absorption, factors affecting, review, 385
- Raw materials**; cosmetics; analysis, developments, 407
- Release**; aluminum chlorohydrate; antiperspirants, formulations, solutions vs suspensions, humans, 179
- Resistance**; parabens; *E. coli*, and other bacteria, factors affecting, 75
- Rheology**
emulsions; cosmetics, stability evaluation methods, 345
foams; soaps, relation, bubble size, 131
- Salicylamide**; stability; suspensions, with polysorbate 80, effects, polyols, 149
- Sedimentation**
butamben; suspensions, with polysorbate 80, effects, polyols, 149
salicylamide; suspensions, with polysorbate 80, effects, polyols, 149
sulfamerazine; suspensions, with polysorbate 80, effects, polyols, 149
- Shampoos**
bases; vehicles, parabens, effects, resistance, *E. coli* and other bacteria, 75
pyrithione zinc, comparison, triclosan; effects, antimicrobial and antidandruff, humans, 27
triclosan, comparison, pyrithione zinc; effects, antimicrobial and antidandruff, humans, 27
- Simulsol 96**, see **Oleth-10**
- Skin**
corneocytes; desquamation, evaluations, computers, humans, 1
effects; mineral oil, comparison, triglycerides, mice, 93
elasticity; effects, temperature and moisture, relaxation, excised hamster skin, 169
emollients; emulsions, w/o, comparison, o/w, effects, humans, 263
Pseudomonas aeruginosa; colonization, transient, humans, 225
- Soaps**; foams, rheology, relation, bubble size, 131
- Sodium laurate**; combination, sodium oleate, sodium palmitate; soaps, foam, rheology, relation, bubble size, 131
- Sodium laureth sulfate**; analysis; 1,4-dioxane, GC/ML, ion monitoring, 19
- Sodium oleate**; combination, sodium laurate, sodium palmitate; soaps, foam, rheology, relation, bubble size, 131
- Sodium palmitate**; combination, sodium laurate, sodium oleate; soaps, foam, rheology, relation, bubble size, 131
- Sodium-2-pyridinethiol-1-oxide**, see **Pyrithione sodium**
- Solubility**
parabens; effects, resistance, *E. coli* and other bacteria, 75
salicylamide; effects, polyols, suspensions, with polysorbate 80, 149
sulfamerazine; effects, polyols, suspensions, with polysorbate 80, 149
- Solubilization**; butylparaben; preservatives, cosmetics, effects, nonionic surfactants, 297
- Solubilizing agents**; polyols; effects, stability, suspensions, hydrophobic solids, with polysorbate 80, 149
- Solutions**; aluminum chlorohydrate; antiperspirants, comparison, suspensions, formulations, humans, 179

- Sorbitan monooleate**; emulsifying agents; effects, HLB, o/w emulsions, occlusivity, formulations, 157
- Sorbitol**; effects; stability, suspensions, hydrophobic solids, with polysorbate 80, 149
- Spectrometry, mass**; 1,4-dioxane; ethoxylated compounds, and GC, ion monitoring, 19
- Squalane**; emulsions; occlusivity, o/w, effects, surfactants, HLB, formulations, 157
- Stability**
 butamben; suspensions, with polysorbate 80, effects, polyols, 149
 emulsions; cosmetics, mechanisms, methods, evaluations, 345
 pyrrithione sodium; solutions, hydrolysis, effects, pH and temperature, storage, 243
 salicylamide; suspensions, with polysorbate 80, effects, polyols, 149
 sulfamerazine; suspensions, with polysorbate 80, effects, polyols, 149
- Storage**; pyrrithione sodium; stability, and hydrolysis, solutions, pH and temperature effects, 243
- Structure**
 α -keratin; fibers, hair, effects, physical properties, factors, review, 385
 aluminum chlorohydrate; antiperspirants, mechanism of action, in vitro simulation, 281
 aluminum hydroxide; antiperspirants, aluminum chlorohydrate, conversion, in vitro simulation, 281
- Structure-activity relationships**; aluminum chlorohydrate; antiperspirants, in vitro simulations, 281
- Sulfamerazine**; stability; suspensions, with polysorbate 80, effects, polyols, 149
- Sulfites**; hair waving; effects, hair fibers, comparison, thioglycolates, 363
- Sunscreen agents**
 evaluations; protection factor, methods, animals, 9
 Sun Protection Factor; evaluation, range finding technique, humans, 259
- Surface active agents**
 analysis; cosmetics, raw materials, developments, 407
 ethoxylated; analysis, 1,4-dioxane, GC/ML, ion monitoring, 19
 nonionic; effects, HLB, o/w emulsions, occlusivity, emulsions, 157; hydrophilic/lipophilic balance, effects, emulsions, critical micelle concentration, 115; solubilization, butylparaben, preservatives, cosmetics, effects, 297
 polysorbate 80; suspensions, hydrophobic solids, stability, effects, polyols, 149
- Suspensions**; aluminum chlorohydrate; antiperspirants, sticks, comparison, solutions, formulations, humans, 179
- Sweet almond oil**, see **Almond oil**
- Temperature**
 effects; α -keratin, hair fibers, physical properties, review, 407
 pyrrithione sodium; effects, hydrolysis, solutions, storage, 243
 skin; effects, elasticity and relaxation, excised hamster skin, 169
- Tests**; patch; allergens, irritants, cosmetics, lack, clinical correlation, factors affecting, 309
- Thioglycolates**; hair waving; effects, hair fibers, comparison, sulfite setting solutions, 363
- p-Toluidine**; contaminants; dyes, cosmetics, analysis, developments, 407
- Topical preparations**
 mineral oil, comparison, triglycerides; effects, skin, mice, 93
 triglycerides, comparison, mineral oil; effects, skin, mice, 9
- Toxicity**
 chlorine; solutions, hair, fibers, human, friction and morphology effects, analysis, 229
 cosmetics; allergens, irritants, patch tests, lack, clinical correlation, factors affecting, 309; eye preparations, side effects, discussion, 249
 jojoba wax; lack, topical and SC, long term, animals, 141
 mineral oil; topical acanthosis, skin, mice, 93
- Triclosan**; comparison, pyrrithione zinc; effects, antimicrobial and antidandruff, shampoos, humans, 27
- Triglycerides**; comparison, mineral oil; topical, effects, skin, mice, 93
- Vehicles**
 aluminum chlorohydrate; antiperspirants, effects, formulations, humans, 179
 parabens; effects, resistance, *E. coli* and other bacteria, 75
- Viscoelasticity**; emulsions; cosmetics, stability evaluation methods, 345
- Viscosity**; soaps; solutions, effects, foams, rheology and bubble size, 131
- Water**; effects; α -keratin, hair fibers, physical properties, review, 385
- X-ray diffraction**; α -keratin; fibers, hair, factors affecting, review, 385
